

CommerceBuyGrp Namespace

The `CommerceBuyGrp` namespace provides classes and methods for retrieving information about the buyer groups associated with a user.

The following are the classes in the `CommerceBuyGrp` namespace.

- [BuyerGroupEvaluationService Class](#)
The `BuyerGroupEvaluationService` class allows you define and execute custom business logic for dynamically assigning users to buyer groups. Unlike out-of-the-box configurations limited to account, market, or data segment-based buyer groups, this service supports extensibility and empowers you to implement tailored buyer group evaluation strategies. It supports both guest and logged-in user scenarios, enabling highly customizable and context-specific buyer group determination.
- [BuyerGroupRequest Class](#)
Contains methods to retrieve account and store details used to identify the buyer groups associated with a user.
- [BuyerGroupResponse Class](#)
Contains constructors and methods to retrieve the buyer groups associated with a user.
