

PaymentGatewayNotificationContext Class

Wraps the information related to a gateway notification.

Namespace

[CommercePayments](#)

Usage

This class is used with asynchronous payments. It wraps all of the information related to a notification from the payment gateway. The payments platform provides its context to the gateway adapters.

The constructor of this class takes no arguments. For example:

```
CommercePayments.PaymentGatewayNotificationContext pgnc = new  
CommercePayments.PaymentGatewayNotificationContext();
```

Example

```
global commercepayments.GatewayNotificationResponse  
processNotification(commercepayments.PaymentGatewayNotificationContext gatewayNo  
commercepayments.PaymentGatewayNotificationRequest notificationRequest = gateway  
}
```
