

ConnectApi.AlternativePaymentMethod

A payment method that doesn't have a defined Salesforce entity such as CardPaymentMethod or DigitalWallet. Common examples of alternative payment methods include CashOnDelivery, Klarna, and Direct Debit. AlternativePaymentMethod functions the same as any other type of payment method for processing transactions in the payment gateway.

Subclass of [ConnectApi.BasePaymentMethodRequest](#)

Property	Type	Description	Required or Optional	Available in
accountId	String	Salesforce Payments account to which this payment method is linked.	Required	54.0 and later
comments	String	Details about a record added by a user. Maximum of 1,000 characters.	Optional	54.0 and later
email	String	Email address of the card holder.	Optional	54.0 and later
gatewayToken	String	A unique, alphanumeric ID, called a token, that a payment gateway generates when it first processes a payment. The token replaces the actual payment data so that the data is kept secure. This token is stored as encrypted text, and can be used for recurring payments.	Required	54.0 and later
gatewayTokenDetails	String	Detailed information about the gateway token.	Required	54.0 and later
name	String	Name that you assign to the payment method object.	Optional	54.0 and later
