

CalculateTaxType Enum

Shows whether a tax calculation request is for estimated or actual tax.

Usage

Used by the [CalculateTaxRequest](#) and [CalculateTaxResponse](#) class methods.

Enum Values

The `commercetax.CalculateTaxType` enum includes these values.

Value	Description
Actual	Specifies that the tax calculation service should calculate the finalized (actual) tax for the requested line items.
Estimated	Specifies that the tax calculation service should estimate the tax for the requested line items.
