

CustomOneTimePasswordDeliveryEnum

Indicates the status of an attempt to send a one-time password (OTP) to an external custom messaging provider.

Usage

To use this feature, contact Salesforce Customer Support.

This enum specifies the result of the `sendOneTimePassword` method in an implementation of the `Auth.CustomOneTimePasswordDeliveryHandler` interface.

Enum Values

The following are the values of the `Auth.CustomOneTimePasswordDeliveryResult` enum.

Value	Description
COUNTRY_BLOCK	Indicates that the user's phone number has a country code that doesn't support.
EXCEPTION	Indicates that the handler threw an exception.
INVALID_PHONE_NUMBER	Indicates that the user's phone number isn't valid. For example, wrong format or contains characters that aren't numbers.
MESSAGE_LIMIT_EXCEEDED	Indicates that your Experience Cloud site reached the message limit by your license.
PROVIDER_ERROR	Indicates an error with the custom OTP service.
SUCCESS	Indicates that the OTP message was successfully sent to the user.
