

# ConnectApi.CartEvaluateShippingInput

Shipping address and custom fields used to calculate shipping costs for a cart.

Property	Type	Description
customFields	List<SObject>	Array of sObject and custom field for the sObject. Standard fields are ignored. The custom fields must already be defined for the sObject. Currently the WebCart, CartItem, and CartDeliveryGroup sObjects are supported. Field-level security rules from the <a href="#">shopping profile</a> are applied to the custom fields. The rules are applied for registered shoppers and for the guest shopping profile. See <a href="#">Create a Cart and Cart Item with Custom Fields in a Commerce Store</a>
shippingAddress	ConnectApi.CartShippingAddressInputRepresentation	Shipping address for a cart.
