

# MultiStaticResourceCalloutMock Class

Utility class used to specify a fake response using multiple resources for testing HTTP callouts.

## Namespace

[System](#)

## Usage

Use the methods in this class to set the response properties for testing HTTP callouts. You can specify a resource for each endpoint.

## MultiStaticResourceCalloutMock Constructors

The following are constructors for `MultiStaticResourceCalloutMock`.

- [MultiStaticResourceCalloutMock\(\)](#)  
Creates a new instance of the `System.MultiStaticResourceCalloutMock` class.

### MultiStaticResourceCalloutMock()

Creates a new instance of the `System.MultiStaticResourceCalloutMock` class.

#### Signature

```
public MultiStaticResourceCalloutMock()
```

## MultiStaticResourceCalloutMock Methods

The following are methods for `MultiStaticResourceCalloutMock`. All are instance methods.

- [setHeader\(headerName, headerValue\)](#)  
Sets the specified header name and value for the fake response.
- [setStaticResource\(endpoint, resourceName\)](#)  
Sets the specified static resource corresponding to the endpoint. The static resource contains the response body.
- [setStatus\(httpStatus\)](#)  
Sets the specified HTTP status for the response.
- [setStatusCode\(httpStatusCode\)](#)  
Sets the specified HTTP status code for the response.

### setHeader(headerName, headerValue)

Sets the specified header name and value for the fake response.

#### Signature

Type: [String](#)

***headerValue***

Type: [String](#)

**Return Value**

Type: Void

**setStaticResource(endpoint, resourceName)**

Sets the specified static resource corresponding to the endpoint. The static resource contains response body.

**Signature**

```
public Void setStaticResource(String endpoint, String resourceName)
```

**Parameters**

***endpoint***

Type: [String](#)

***resourceName***

Type: [String](#)

**Return Value**

Type: Void

**setStatus(httpStatus)**

Sets the specified HTTP status for the response.

**Signature**

```
public Void setStatus(String httpStatus)
```

**Parameters**

***httpStatus***

Type: [String](#)

**Return Value**

Type: Void

**setStatusCode(httpStatusCode)**

Sets the specified HTTP status code for the response.

**Signature**

```
public Void setStatusCode(Integer httpStatusCode)
```

**Parameters**

***httpStatusCode***

Type: [Integer](#)

**Return Value**
