

# Exchanges Class

Preview and submit cart to exchange orders.

## Namespace

[ConnectApi](#)

## Exchanges Methods

These methods are for `Exchanges`. All methods are static.

- [previewCartToExchangeOrder\(\[previewCartToExchangeOrderInput\]\(#\)\)](#)  
Retrieves a preview of an exchange order, taking into account the order summary balance and the difference between the return order and the cart that represents the exchange order.
- [submitCartToExchangeOrder\(\[submitCartToExchangeOrderInput\]\(#\)\)](#)  
Creates an exchange order summary, based on the return order and the cart used for exchanges. The new exchange order summary is attached to the original order summary (created before any exchanges occurred). You can also provide optional payment information and optional information about order summary sequences, which affect the newly created exchange order summary.

### [previewCartToExchangeOrder\(\[previewCartToExchangeOrderInput\]\(#\)\)](#)

Retrieves a preview of an exchange order, taking into account the order summary balance and the difference between the return order and the cart that represents the exchange order.

#### API Version

60.0

#### Requires Chatter

No

#### Signature

```
public static ConnectApi.PreviewCartToExchangeOrderOutputRepresentation  
previewCartToExchangeOrder(ConnectApi.PreviewCartToExchangeOrderInputRepresentation  
previewCartToExchangeOrderInput)
```

#### Parameters
