

# ConnectApi.AdjustItemInputRepresentation

A price adjustment to an OrderItemSummary. It only supports discounts, not increases.

Property	Type	Description	Required or Optional
adjustmentType	String	Describes how the amount is calculated. It can have one of these values: <ul style="list-style-type: none"><li>AmountWithTax –Value of amount is the adjustment, including tax.</li><li>AmountWithoutTax –Value of amount is the adjustment, not including tax. Tax is calculated on the value and added.</li><li>Percentage –Value of amount is a percentage discount. It is divided by 100, and then multiplied by the TotalPrice and TotalTaxAmount of the OrderItemSummary to determine the adjustment amount.</li></ul>	Required
amount	Double	Value used to calculate the adjustment amount, as described by the adjustmentType. It must be a negative value.	Required
description	String	Description of the adjustment.	Optional
orderItemSummaryId	String	ID of the OrderItemSummary.	Required
reason	String	Reason for the adjustment. The value must match one of the picklist values on the Reason field of the OrderItemSummaryChange object.	Required
