

# CommercePromotions Class

Evaluate promotions for Commerce orders. Get coupon code redemption usage.

## Namespace

ConnectApi

## CommercePromotions Methods

These methods are for `CommercePromotions`. All methods are static.

### Note

Don't write an Apex test that calls these `CommercePromotions` APIs within the context of a guest.

- `decreaseRedemption(couponCodeRedemption)`**  
Get coupon code redemption usage to revert a previously redeemed coupon code.
- `evaluate(salesTransaction)`**  
Determine which promotions the customer is eligible for based on the store and buyer group, and compute the applicable price adjustments based on the coupons and the items in the cart. This API evaluates only the first 50 active manual promotions and first 50 active automatic promotions, based on priority. This API computes and returns applicable price adjustments, but it does not apply those adjustments to the webcart record. If you want to enable promotions based on shipping, contact Salesforce Customer Support.
- `increaseRedemption(couponCodeRedemption)`**  
Get coupon code redemption addition (increase) usage.

### `decreaseRedemption(couponCodeRedemption)`

Get coupon code redemption usage to revert a previously redeemed coupon code.

#### API Version
