- **updateWishlist(webstoreId, wishlistId, wishlistUpdateInput)**
  Update the name of a wishlist for the context user.

- **updateWishlist(webstoreId, effectiveAccountId, wishlistId, wishlistUpdateInput)**
  Update the name of a wishlist.

addItemToWishlist(webstoreId, wishlistId, wishlistItemInput)

Add an item to a wishlist for the context user.

API Version

49.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistItem addItemToWishlist(String webstoreId, String wishlistId,
ConnectApi.WishlistItemInput wishlistItemInput)
```

Parameters

webstoreId
  Type: String

  ID of the webstore.

wishlistId
  Type: String

  ID of the wishlist.

wishlistItemInput
  Type: `ConnectApi.WishlistItemInput`

  A `ConnectApi.WishlistItemInput` body with the item to add to the wishlist.

Return Value

Type: `ConnectApi.WishlistItem`

Usage

This method respects buyer View Product entitlements and only users entitled to view product data can access it.

addItemToWishlist(webstoreId, effectiveAccountId, wishlistId, wishlistItemInput)

Add an item to a wishlist.

API Version

49.0

```
public static ConnectApi.WishlistItem addItemToWishlist(String webstoreId, String
effectiveAccountId, String wishlistId, ConnectApi.WishlistItemInput wishlistItemInput)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

wishlistId

Type: String

ID of the wishlist.

wishlistItemInput

Type: `ConnectApi.WishlistItemInput`

A `ConnectApi.WishlistItemInput` body with the item to add to the wishlist.

Return Value

Type: `ConnectApi.WishlistItem`

Usage

This method respects buyer View Product entitlements and only users entitled to view product data can access it.

addWishlistToCart(webstoreId, wishlistId)

Add a wishlist to the active cart for the context user.

API Version

49.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistToCartResult addWishlistToCart(String webstoreId, String
wishlistId)
```

Parameters

webstoreId

Type: String

ID of the webstore.

wishlistId

Type: String

ID of the wishlist.

This method respects buyer View Product entitlements and only users entitled to view product data can access it.

addWishlistToCart(webstoreId, wishlistId, effectiveAccountId)

Add a wishlist to the active cart.

API Version

49.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistToCartResult addWishlistToCart(String webstoreId, String
wishlistId, String effectiveAccountId)
```

Parameters

webstoreId

Type: String

ID of the webstore.

wishlistId

Type: String

ID of the wishlist.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

Return Value

Type: ConnectApi.WishlistToCartResult

Usage

This method respects buyer View Product entitlements and only users entitled to view product data can access it.

addWishlistToCartWithCartId(webstoreId, wishlistId, cartId)

Add a wishlist to a cart.

API Version

49.0

Requires Chatter

No

Signature

webstoreId

    Type: String

    ID of the webstore.

wishlistId

    Type: String

    ID of the wishlist.

cartId

    Type: String

    ID of the cart. If `null`, wishlist items are added to the active cart.

Return Value

Type: ConnectApi.WishlistToCartResult

Usage

This method respects buyer View Product entitlements and only users entitled to view product data can access it.

addWishlistToCartWithCartId(webstoreId, wishlistId, cartId, effectiveAccountId)

Add a wishlist to a cart.

API Version

49.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistToCartResult addWishlistToCartWithCartId(String webstoreId,
String wishlistId, String cartId, String effectiveAccountId)
```

Parameters

webstoreId

    Type: String

    ID of the webstore.

wishlistId

    Type: String

    ID of the wishlist.

cartId

    Type: String

    ID of the cart. If `null`, wishlist items are added to the active cart.

effectiveAccountId

    Type: String

Type: [ConnectApi.WishlistToCartResult](#)

Usage

This method respects buyer View Product entitlements and only users entitled to view product data can access it.

createWishlist(webstoreId, wishlistInput)

Create a wishlist for the context user.

API Version

49.0

Requires Chatter

No

Signature

```
public static ConnectApi.Wishlist createWishlist(String webstoreId, ConnectApi.WishlistInput
wishlistInput)
```

Parameters

webstoreId

  Type: [String](#)

  ID of the webstore.

wishlistInput

  Type: `ConnectApi.WishlistInput`

  A `ConnectApi.WishlistInput` body that includes the wishlist name and items.

Return Value

Type: `ConnectApi.Wishlist`

createWishlist(webstoreId, effectiveAccountId, wishlistInput)

Create a wishlist.

API Version

49.0

Requires Chatter

No

Signature

```
public static ConnectApi.Wishlist createWishlist(String webstoreId, String effectiveAccountId,

```

Parameters

webstoreId

  Type: [String](#)

  ID of the webstore.

context user.

wishlistInput

Type: `ConnectApi.WishlistInput`

A `ConnectApi.WishlistInput` body that includes the wishlist name and items.

Return Value

Type: `ConnectApi.Wishlist`

deleteWishlist(webstoreId, wishlistId)

Delete a wishlist for the context user.

API Version

49.0

Requires Chatter

No

Signature

```
public static Void deleteWishlist(String webstoreId, String wishlistId)
```

Parameters

webstoreId

Type: String

ID of the webstore.

wishlistId

Type: String

ID of the wishlist.

Return Value

Type: Void

deleteWishlist(webstoreId, effectiveAccountId, wishlistId)

Delete a wishlist.

API Version

51.0

Requires Chatter

No

Signature

```
public static Void deleteWishlist(String webstoreId, String effectiveAccountId, String
wishlistId)
```

Parameters

webstoreId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

wishlistId

Type: String

ID of the wishlist.

Return Value

Type: Void

getWishlist(webstoreId, effectiveAccountId, wishlistId, productFields, sortItemsBy)

Get a wishlist with product fields sorted by items.

API Version

51.0

Requires Chatter

No

Signature

```
public static ConnectApi.Wishlist getWishlist(String webstoreId, String effectiveAccountId,
String wishlistId, String productFields, ConnectApi.WishlistItemSortOrder sortItemsBy)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

wishlistId

Type: String

ID of the wishlist.

productFields

Type: String

Comma-separated list of custom product fields. Fields aren't case-sensitive. For example, `ProductCode` and `productcode` return the same results.

sortItemsBy

Type: `ConnectApi.WishlistItemSortOrder`

Sort order for wishlist items. Values are:

- `CreatedDateAsc` —Sorts by oldest creation date.
- `CreatedDateDesc` —Sorts by most recent creation date.

The default sort order is `CreatedDateDesc`.

Get a wishlist with product fields sorted by items with a specified number of items per page.

API Version

51.0

Requires Chatter

No

Signature

```
public static ConnectApi.Wishlist getWishlist(String webstoreId, String effectiveAccountId,
String wishlistId, String productFields, Integer pageSize, ConnectApi.WishlistItemSortOrder
sortItemsBy)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

wishlistId

Type: String

ID of the wishlist.

productFields

Type: String

Comma-separated list of custom product fields. Fields aren't case-sensitive. For example, `ProductCode` and `productcode` return the same results.

pageSize

Type: Integer

Specifies the number of items per page. Valid values are from 1 through 100. If you pass in `null`, the default size is 25.

sortItemsBy

Type: `ConnectApi.WishlistItemSortOrder`

Sort order for wishlist items. Values are:

- `CreatedDateAsc`—Sorts by oldest creation date.
- `CreatedDateDesc`—Sorts by most recent creation date.

The default sort order is `CreatedDateDesc`.

Return Value

Type: `ConnectApi.Wishlist`

API Version

51.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistItemCollection getWishlistItems(String webstoreId, String
effectiveAccountId, String wishlistId, String productFields, String pageParam,
ConnectApi.WishlistItemSortOrder sortItemsBy)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the
context user.

wishlistId

Type: String

ID of the wishlist.

productFields

Type: String

Comma-separated list of custom product fields. Fields aren't case-sensitive. For example,
`ProductCode` and `productcode` return the same results.

pageParam

Type: String

Specifies the page token to use to view a page of information. Page tokens are returned as part of
the response class, such as `currentPageToken` or `nextPageToken`. If you pass in `null`, the first page is
returned.

sortItemsBy

Type: `ConnectApi.WishlistItemSortOrder`

Sort order for wishlist items. Values are:

- `CreatedDateAsc`—Sorts by oldest creation date.
- `CreatedDateDesc`—Sorts by most recent creation date.

The default sort order is `CreatedDateDesc`.

Return Value

Type: `ConnectApi.WishlistItemCollection`

getWishlistItems(webstoreId, effectiveAccountId, wishlistId, productFields, pageParam, pageSize, sortItemsBy)

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistItemCollection getWishlistItems(String webstoreId, String
effectiveAccountId, String wishlistId, String productFields, String pageParam, Integer
pageSize, ConnectApi.WishlistItemSortOrder sortItemsBy)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

wishlistId

Type: String

ID of the wishlist.

productFields

Type: String

Comma-separated list of custom product fields. Fields aren't case-sensitive. For example, `ProductCode` and `productcode` return the same results.

pageParam

Type: String

Specifies the page token to use to view a page of information. Page tokens are returned as part of the response class, such as `currentPageToken` or `nextPageToken`. If you pass in `null`, the first page is returned.

pageSize

Type: Integer

Specifies the number of items per page. Valid values are from 1 through 200. If you pass in `null`, the default size is 25.

sortItemsBy

Type: `ConnectApi.WishlistItemSortOrder`

Sort order for wishlist items. Values are:

- `CreatedDateAsc`—Sorts by oldest creation date.
- `CreatedDateDesc`—Sorts by most recent creation date.

The default sort order is `CreatedDateDesc`.

Return Value

Type: `ConnectApi.WishlistItemCollection`

API Version

49.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistsSummary getWishlistSummaries(String webstoreId, String
effectiveAccountId, Boolean includeDisplayedList)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

includeDisplayedList

Type: Boolean

Specifies whether to include the displayed list (`true`) or not (`false`). If `null`, defaults to `false`.

Return Value

Type: `ConnectApi.WishlistsSummary`

getWishlistSummaries(webstoreId, effectiveAccountId, includeDisplayedList, productFields, sortItemsBy)

Get wishlist summaries with product fields sorted by items.

API Version

51.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistsSummary getWishlistSummaries(String webstoreId, String
effectiveAccountId, Boolean includeDisplayedList, String productFields,
ConnectApi.WishlistItemSortOrder sortItemsBy)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

includeDisplayedList

Type: Boolean

Specifies whether to include the displayed list (`true`) or not (`false`).

productFields

Type: String

Comma-separated list of custom product fields. Fields aren't case-sensitive. For example, `ProductCode` and `productcode` return the same results.
If *includeDisplayedList* is `false`, *productFields* is ignored.

sortItemsBy

Type: `ConnectApi.WishlistItemSortOrder`

Sort order for wishlist items. Values are:

- `CreatedDateAsc` –Sorts by oldest creation date.
- `CreatedDateDesc` –Sorts by most recent creation date.

The default sort order is `CreatedDateDesc`.
If *includeDisplayedList* is `false`, *sortItemsBy* is ignored.

Return Value

Type: `ConnectApi.WishlistsSummary`

getWishlistSummaries(webstoreId, effectiveAccountId, includeDisplayedList, productFields, pageSize, sortItemsBy)

Get wishlist summaries with product fields sorted by items with a specified number of items per page.

API Version

51.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistsSummary getWishlistSummaries(String webstoreId, String
effectiveAccountId, Boolean includeDisplayedList, Integer pageSize, String productFields,
pageSize, ConnectApi.WishlistItemSortOrder sortItemsBy)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

includeDisplayedList

Type: Boolean

Comma-separated list of custom product fields. Fields aren't case-sensitive. For example, `ProductCode` and `productcode` return the same results.
If *includeDisplayedList* is `false`, *productFields* is ignored.

pageSize

Type: Integer

Specifies the number of items per page. Valid values are from 1 through 100. If you pass in `null`, the default size is 25.

sortItemsBy

Type: `ConnectApi.WishlistItemSortOrder`

Sort order for wishlist items. Values are:

- `CreatedDateAsc` —Sorts by oldest creation date.
- `CreatedDateDesc` —Sorts by most recent creation date.

The default sort order is `CreatedDateDesc`.
If *includeDisplayedList* is `false`, *sortItemsBy* is ignored.

Return Value

Type: `ConnectApi.WishlistsSummary`

removeWishlistItem(webstoreId, effectiveAccountId, wishlistId, wishlistItemId)

Remove an item from a wishlist.

API Version

49.0

Requires Chatter

No

Signature

```
public static Void removeWishlistItem(String webstoreId, String effectiveAccountId, String
wishlistId, String wishlistItemId)
```

Parameters

webstoreId

Type: String

ID of the webstore.

effectiveAccountId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

wishlistId

Type: String

ID of the wishlist.

wishlistItemId

Type: Void

updateWishlist(webstoreId, wishlistId, wishlistUpdateInput)

Update the name of a wishlist for the context user.

API Version

50.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistSummary updateWishlist(String webstoreId, String wishlistId,
ConnectApi.WishlistUpdateInput wishlistUpdateInput)
```

Parameters

webstoreId

Type: String

ID of the webstore.

wishlistId

Type: String

ID of the wishlist.

wishlistUpdateInput

Type: `ConnectApi.WishlistUpdateInput`

A `ConnectApi.WishlistUpdateInput` body with the wishlist name to update.

Return Value

Type: `ConnectApi.WishlistSummary`

updateWishlist(webstoreId, effectiveAccountId, wishlistId, wishlistUpdateInput)

Update the name of a wishlist.

API Version

50.0

Requires Chatter

No

Signature

```
public static ConnectApi.WishlistSummary updateWishlist(String webstoreId, String
effectiveAccountId, String wishlistId, ConnectApi.WishlistUpdateInput wishlistUpdateInput)
```

Parameters

webstoreId

Type: String

ID of the account for which the request is made. If `null`, defaults to the account ID for the context user.

wishlistId

Type: String

ID of the wishlist.

wishlistUpdateInput

Type: `ConnectApi.WishlistUpdateInput`

A `ConnectApi.WishlistUpdateInput` body with the wishlist name to update.

Return Value

Type: `ConnectApi.WishlistSummary`
