ConnectApi.AnnouncementInput

An announcement.

Property	Type	Description	Required or Optional	Ava
body	ConnectApi.MessageBodyInput	Text of the announcement.	Required for creating an announcement if `feedItemId` isn't specified Don't specify for updating an announcement.	31.
expirationDate	Datetime	The Salesforce UI displays an announcement until 11:59 p.m. on this date unless another announcement is posted first. The Salesforce UI ignores the time value in the `expirationDate`. However, you can use the time value to create your own display logic in your own UI.	Required for creating an announcement Optional for updating an announcement	31.
feedItemId	String	ID of an `AdvancedTextPost` feed item that is the body of the announcement.	Required for creating an announcement if `body` isn't specified Don't specify for updating an announcement.	36.
isArchived	Boolean	Specifies whether the announcement is archived.	Optional	36.

		entity for the announcement, that is, a group ID when the announcement appears in a group.	creating an announcement if `feedItemId` isn't specified Don't specify for updating an announcement.	
`sendEmails`	[Boolean]	Specifies whether the announcement is sent as an email to all group members regardless of their email setting for the group. If Chatter emails aren't enabled for the organization, announcement emails aren't sent. Default value is `false`.	Optional for creating an announcement Don't specify for updating an announcement	36.(
