Announcements Class ☰

Announcements Class

Access information about announcements and post announcements.
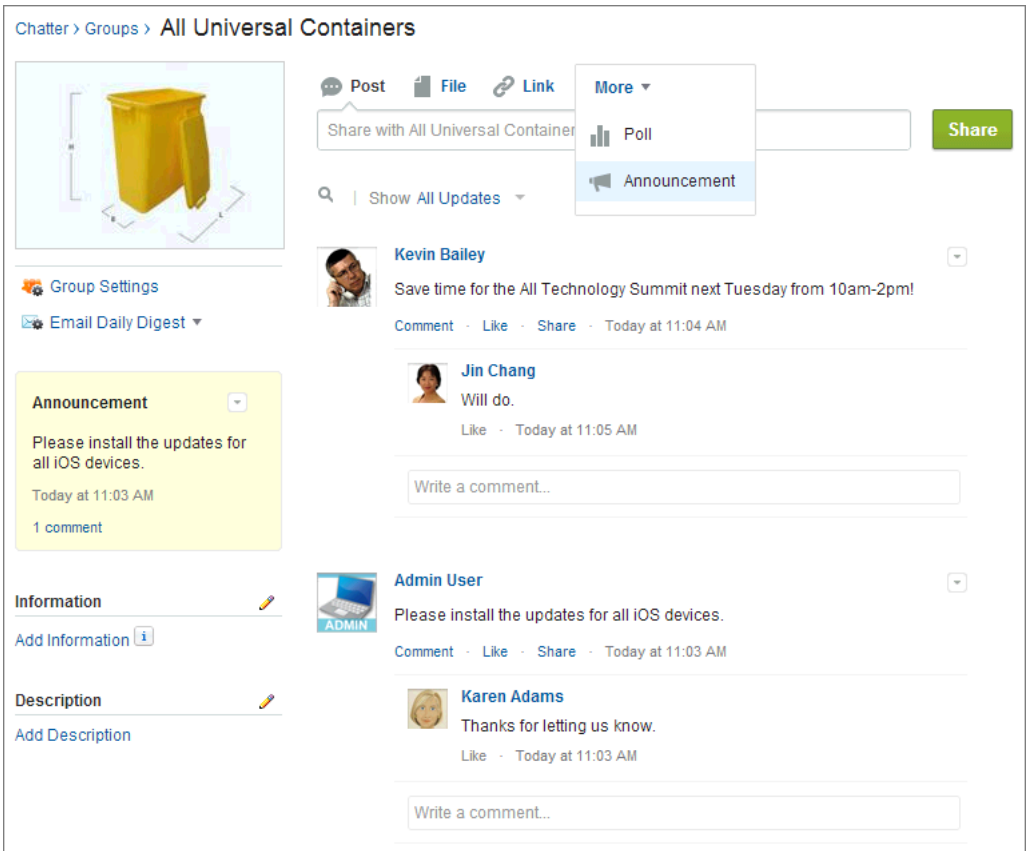

Namespace

ConnectApi

Usage

Use the `ConnectApi.Announcements` class to get, create, update, and delete announcements. Use an announcement to highlight information. Users can discuss, like, and post comments on announcements. Deleting the feed post deletes the announcement.

This image shows an announcement displayed in a group. Creating an announcement also creates a feed item with the announcement text.

An announcement displays in a designated location in the Salesforce UI until 11:59 p.m. on its expiration date, unless it's deleted or replaced by another announcement.

Announcements Methods

Delete an announcement.

- **getAnnouncement(communityId, announcementId)**
  Get an announcement.
- **getAnnouncements(communityId, parentId)**
  Get the first page of announcements.
- **getAnnouncements(communityId, parentId, pageParam, pageSize)**
  Get a page of announcements.
- **postAnnouncement(communityId, announcement)**
  Post an announcement.
- **updateAnnouncement(communityId, announcementId, expirationDate)**
  Update the expiration date of an announcement.

deleteAnnouncement(communityId, announcementId)

Delete an announcement.

API Version

31.0

Requires Chatter

Yes

Signature

```
public static void deleteAnnouncement(String communityId, String announcementId)
```

Parameters

communityId

  Type: String

  ID for an Experience Cloud site, `internal`, or `null`.

announcementId

  Type: String

  An announcement ID, which has a prefix of 0BT.

Return Value

Type: Void

Usage

To get a list of announcements in a group, call getAnnouncements(communityId, parentId) or getAnnouncements(communityId, parentId, pageParam, pageSize) .

To post an announcement to a group, call postAnnouncement(communityId, announcement) .

getAnnouncement(communityId, announcementId)

Get an announcement.

API Version

31.0

Requires Chatter

Yes

communityId

Type: String

ID for an Experience Cloud site, `internal`, or `null`.

announcementId

Type: String

An announcement ID, which has a prefix of 0BT.

Return Value

Type: ConnectApi.Announcement

Usage

To get a list of announcements in a group, call getAnnouncements(communityId, parentId) or getAnnouncements(communityId, parentId, pageParam, pageSize).

To post an announcement to a group, call postAnnouncement(communityId, announcement).

getAnnouncements(communityId, parentId)

Get the first page of announcements.

API Version

36.0

Available to Guest Users

38.0

Requires Chatter

Yes

Signature

```
public static ConnectApi.AnnouncementPage getAnnouncements(String communityId, String parentId)
```

Parameters

communityId

Type: String

ID for an Experience Cloud site, `internal`, or `null`.

parentId

Type: String

ID of the parent entity for the announcement, that is, a group ID when the announcement appears in a group.

Return Value

Type: `ConnectApi.AnnouncementPage`

getAnnouncements(communityId, parentId, pageParam, pageSize)

Get a page of announcements.

API Version

Requires Chatter

Yes

Signature

```
public static ConnectApi.AnnouncementPage getAnnouncements(String communityId, String parentId, Integer
pageParam, Integer pageSize)
```

Parameters

communityId

Type: String

ID for an Experience Cloud site, `internal`, or `null`.

parentId

Type: String

ID of the parent entity for the announcement, that is, a group ID when the announcement appears in a group.

pageParam

Type: Integer

Number of the page you want returned. Starts at 0. If you pass in `null` or 0, the first page is returned.

pageSize

Type: Integer

Specifies the number of announcements per page.

Return Value

Type: `ConnectApi.AnnouncementPage`

postAnnouncement(communityId, announcement)

Post an announcement.

API Version

36.0

Requires Chatter

Yes

Signature

```
public static ConnectApi.Announcement postAnnouncement(String communityId, ConnectApi.AnnouncementInput
announcement)
```

Parameters

communityId

Type: String

ID for an Experience Cloud site, `internal`, or `null`.

announcement

Type: `ConnectApi.AnnouncementInput`

updateAnnouncement(communityId, announcementId, expirationDate)

Update the expiration date of an announcement.

API Version

31.0

Requires Chatter

Yes

Signature

```
public static ConnectApi.Announcement updateAnnouncement(String communityId, String announcementId, Datetime
expirationDate)
```

Parameters

communityId

Type: String

ID for an Experience Cloud site, `internal`, or `null`.

announcementId

Type: String

An announcement ID, which has a prefix of 0BT.

expirationDate

Type: Datetime

The Salesforce UI displays an announcement until 11:59 p.m. on this date unless another announcement is posted first. The Salesforce UI ignores the time value in the `expirationDate`. However, you can use the time value to create your own display logic in your own UI.

Return Value

Type: ConnectApi.Announcement

Usage

To get a list of announcements in a group, call getAnnouncements(communityId, parentId) or getAnnouncements(communityId, parentId, pageParam, pageSize) .

To post an announcement to a group, call postAnnouncement(communityId, announcement) .
