ExternalManagedAccount Class

Get externally managed accounts.

Namespace

ConnectApi

ExternalManagedAccount Methods

These methods are for `ExternalManagedAccount`. All methods are static.

- **getCommunitiesExternalManagedAccounts(communityId)**
  Get externally managed accounts available to the context user across all Experience Cloud sites.

- **getCommunitiesExternalManagedAccounts(communityId, includeMyAccount)**
  Get externally managed accounts available to the context user, including the context user's account, across all Experience Cloud sites.

- **getExternalManagedAccounts(webstoreId)**
  Get externally managed accounts for a store.

- **getExternalManagedAccounts(webstoreId, includeMyAccount)**
  Get externally managed accounts, including the context user's account, for a store.

getCommunitiesExternalManagedAccounts(communityId)

Get externally managed accounts available to the context user across all Experience Cloud sites.

API Version

50.0

Requires Chatter

No

Signature

```
public static ConnectApi.ExternalManagedAccountCollectionOutput
getCommunitiesExternalManagedAccounts(String communityId)
```

Parameters

communityId

Type: String

ID for an Experience Cloud site, `internal`, or `null`.

> ℹ **Note**
>
> Regardless of the ID specified, this method returns externally managed accounts available to the context user across all Experience Cloud sites.

getCommunitiesExternalManagedAccounts(communityId, includeMyAccount)

Get externally managed accounts available to the context user, including the context user's account, across all Experience Cloud sites.

API Version

53.0

Requires Chatter

No

Signature

```
public static ConnectApi.ExternalManagedAccountCollectionOutput
getCommunitiesExternalManagedAccounts(String communityId, Boolean includeMyAccount)
```

Parameters

communityId

Type: String

ID for an Experience Cloud site, `internal`, or `null`.

> ⓘ **Note**
>
> Regardless of the ID specified, this method returns externally managed accounts available to the context user across all Experience Cloud sites.

includeMyAccount

Type: Boolean

Specifies whether to return the context user's account (`true`) or not (`false`). The default value is `false`.

Return Value
