Developers

AccessType Enum

AccessType Enum

Specifies the access check type for the fields of an sObject.

Usage

Use these enum values for the `accessCheckType` parameter of the [stripInaccessible](#) method.

Enum Values

The following are the values of the `System.AccessType` enum.

Value	Description
CREATABLE	Check the fields of an sObject for create access.
READABLE	Check the fields of an sObject for read access.
UPDATABLE	Check the fields of an sObject for update access.
UPSERTABLE	Check the fields of an sObject for both insert and update access.
