IntegratingAppType Enum

Apex Reference Guide / Auth Namespace / IntegratingAppType Enum

IntegratingAppType Enum

Specifies whether you're integrating your app as a connected app or as an external client app in methods used in your customized Apex token exchange handler, which extends the `Auth.Oauth2TokenExchangeHandler` class.

Usage

See Token Exchange Handler Validation and Subject Mapping.

Enum Values

The following are the values of the `Auth.IntegratingAppType` enum.

Value	Description
CA	Indicates a Salesforce connected app.
ECA	Indicates a Salesforce external client app.
